

*LUMIKER Aplicaciones Tecnológicas, S.L mission is to enable its clients to reduce the CAPEX and OPEX of their Critical Assets by developing and implementing our best fibre optic technology-based monitoring systems.*

*Therefore, the quality, trust and satisfaction of our customers is one of the cornerstones of our activity.*

*We are committed to the following strategic objectives:*

- *Innovation and continuous improvement, to meet our customer requirements with 0 defects.*
- *The complete integration, motivation and satisfaction of the individuals who are part of our teams.*
- *Commitment to meet the legal and other applicable requirements of our products and services.*
- *To reduce wherever possible the Environmental Impact of our Activity, through our Environmental Management System and to minimise the environmental impact of our activities.*
- *We are committed to adapt it to achieve the purposes of the organization and establish the context of the company, including the magnitude, environmental impacts and nature during the activities, services and products.*
- *Provide a frame of reference for setting all environmental objectives in the organization.*
- *Include commitments for the protection of the environment, including pollution prevention and others more specific to the context of the company.*
- *Include a commitment to comply with all compliance obligations.*

- Include a commitment to continual improvement in the Environmental Management System to improve the environmental performance of the organization.
- Our executive team undertakes to lead these policies as a part of the strategic objectives of the company.
